For logging out

```javascript
app.post('/users/logout', auth, async (req, res) => {
    try {
        req.user.tokens = req.user.tokens.filter((token) => {
            return token.token !== req.token
        })
        await req.user.save()

        res.send()
    } catch (e) {
        res.status(500).send()
    }
})

app.post('/users/logoutAll', auth, async (req, res) => {
    try {
        req.user.tokens = []
        await req.user.save()
        res.send()
    } catch (e) {
        res.status(500).send()
    }
})
```
